3	<p><b>Read the following passage carefully and answer the questions.</b></p> <p>We know that by eating healthy food, drinking clear water and breathing clean air we can help our health. Actually, it is not just physical, it is mental, too. So, in order to be healthy mentally we also need other things. For example, having good relationships with others can make us calm. Studies have shown having grandchildren can help old people increase their health very much. In a study, women who spent their time with their grandchildren, had less risk of getting Alzheimer disease than others who did not take care of their grandchildren. Some doctors believe hugging grandchildren or simply holding their hands can help grandparents to make their bodies healthier and stronger! Another reason is, when old people have grandchildren around, they have to play some sports or move and this keeps them active. When they are active, the movements of their body increase, so their heartbeat increases and their blood pressure decreases. As a result of these, they can have a healthier life both physically and mentally.</p> <p><b>Choose the best answer:</b></p> <p>43.
