3	<p>In spring 2008, the polar bear was placed on the endangered species list. According to the USA's Endangered Species Act, an endangered species is an animal, plant or any other kind of wildlife that is likely to face <u>extinction</u> in its natural habitat.</p> <p>The polar bear is the first animal that has been classified as endangered due primarily to global warming. Global warming is a form of climate change caused by increased levels of carbon dioxide and other greenhouse gases that become trapped in the atmosphere.</p> <p>It is not only the polar bear that is at risk in the Arctic. Every species of plant, animal, and insect there is threatened by global warming. Nevertheless, groups of concerned scientists such as the World Wildlife Fund often study large meat eaters in order to assess the health of an ecosystem and protect the wildlife.</p> <p>We should place the polar bear into the endangered species list, because when they are on the list there are laws that protect these animals from being hunted for food or sport.</p> <p>True/ False</p> <p>45. Polar bear is the last animal that has been classified as endangered. True False</p> <p>46. Polar bear is not the only animal which is endangered. True False</p> <p>Choose the best answer</p> <p>47.
