 42-a.save b. participate c hunt d. destroy
 43. a. food b. plan c. program d. future

L) Reading comprehension : Read the passage and answer the questions.

Did you know that our sun is just one star among many in the universe? The fact that the Sun is the closest star to Earth, makes it look much larger and brighter than other stars. It is at the center of our solar system. The Sun, all the planets and their moons, and other bodies that travel around it make up the solar system. The solar system itself is only a small part of a very big system of stars and other objects called the Milky Way galaxy. The solar system orbits the center of galaxy about once every 225 million years. The milky way galaxy is just one of billions of galaxies that in turn make up the universe.

44. How long does it take the solar system to travel around the Milky Way galaxy?
Choose the best answer.

45. Our Sun is much larger than

a. the planets that are orbiting it.
 b. other stars in the Milky Way galaxy.
 c. the galaxies that make up the universe.

46. The solar system is a part of the Milky Way galaxy. True / False

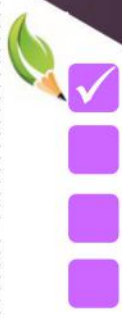

47. The Sun is closer than other stars to Earth. True / False

Good luck
