Modern technologies have enabled us to have easy access to information, become more creative, experience fast communication, travel easier, and have a more comfortable life. Have you ever imagined a world without the Internet, tablets, mobile phones, airplanes, and vacuum cleaners? Most people cannot do that, as technology is the miracle of our time.</p> <p>But using new technologies has changed people's lifestyle in a way that harms their lives in this century as well. Some technologies are dangerous to our health and can harm our body. Using mobile phones or surfing the net for long hours can increase people's blood pressure and cause sleep problems. | | <p>Read the text below and then, answer the questions.</p> <p>Passage 2</p> <p>Today, millions of people want to learn or improve their English but it is difficult to find the best method. Is it better to study in Britain or America or to study in your own country? the advantages of going to Britain seem different.</p> | |

Firstly, you will be able to listen to the language all the time you are in the country. Another advantage is that you have to speak the language if you are with other people. On the other hand, there are also advantages to staying at home to study. You don't have to make big changes to your life. It is also a lot cheaper than going to Britain, but it is never possible to achieve the results of living in the UK. So, if you have enough time and money, the best choice is to spend some time in the UK. This is simply not possible for most people, so being here in Iran is the only option. The most important thing to do in this situation is to speak only English in class and to try to use English whenever possible outside the class.
